

**Have you observed any of the following types of bleeding, which seem to occur for no reason:**

- Increase in spontaneous nosebleeds
- Increase in bruising in unusual places or punctiform bleeding
- Haemarthrosis or soft tissue or muscle bleeding
- Prolonged bleeding after tooth extraction
- Prolonged or increased secondary bleeding from cuts
- Secondary bleeding after operations
- Abnormal bleeding tendencies among your blood relatives (especially your parents or siblings)
- Abnormally slow wound healing
- Known menstrual/bleeding disorders

**For women only:**

- Heavy menstrual bleeding from day 1 lasting  > 7 days  > 7 tampons/day
